

# wePresent WiPG-1000

A basic 1080p wireless presentation system offering wireless screen sharing from any device

- Auto-on for quick presentations during impromptu meetings
- Cross platform compatibility, ideal for BYOD environments
- Up to 4 users can present simultaneously in fixed screen mode
- 1 to many distribution for presenting on multiple displays

WiPG-1000 is the base model presentation solution from the wePresent product line. The entry-level model is packed-full features making it an affordable solution for classrooms, huddle spaces and meeting rooms. WiPG-1000 can connect to your display via HDMI or VGA outputs offering up to 1080p presentations, there's even an audio jack for secondary audio system support.

### Present with any device

In today's Bring Your Own Device environments, cross platform presentations are more important than ever. wePresent makes it easy for users with any device of any type to connect and present their content quickly and easily even without software installation. WiPG-1000 also allows users to share audio/ video content from an iOS device, using Apple's native Airplay protocol.

### Multiple users for simultaneous presentations

Meetings and classrooms come in a variety of sizes. To help manage even the largest environments, wePresent offers interactive presentation and collaboration solutions that allow up to 64 users to connect and participate. All connected users can take turns presenting, fostering a truly collaborative multi-user experience. Using conference control, moderators can select any of the connected participants from the on-screen queue to present, up to 4 at a time.

### Flexible connections & networking with security in mind

WiPG-1000 offers a configurable Wireless Access Point (WAP). Broadcast an additional wireless SSID signal for your team or guests to make a connection. The unit offers enterprise level security with SALSA20 data encryption, gatekeeper settings, and individualized control over IP settings.

### Built in features for interactive experiences

WiPG-1000 offers on board USB ports to connect a Bluetooth mouse to enable the

use of conference controls on screen. For environments with touchscreen displays, WiPG-1000 offers support for touchscreen control.

WiPG-1000 is available exclusively to the EMEA market.
